

Protocol in Coffee using Masinag Organic

1. Nursery

- a. Mix 100kg of chicken manure with 1 ton of soil.
- b. Put the mix soil into the nursery trays.
- c. A day before seeding, water the soil on trays with 1% Masinag solution (mix 1 liter Masinag Organic for every 100 li of water)
- d. Put the seeds into the seed trays.
- e. Water with 1% Masinag solution (mix 1 liter Masinag Organic for every 100 li of water) once a month up to transplanting.

2. Transplanting

1. On the hole of the hill prepared for planting, put a scoop of chicken manure or compost.
2. A day before transplant water the hole with 1% Masinag solution (mix 1 liter Masinag Organic for every 100 li of water).
3. Water the plant with 1% Masinag solution (mix 1 liter Masinag Organic for every 100 li of water) once a month.

Flowering and Fruiting;

1. Spray 1% Masinag solution (mix 1 liter Masinag Organic for every 100 li of water) directly to the leaves and trunks .
2. Do spraying once a month.
3. When flower, stop spraying.
4. Once the fruit occurs, spray with 1% Masinag solution (mix 1 liter Masinag Organic for every 100 li of water)once.
5. Wait for the harvest.

Note: it is best to drench the trees with 4 liters of solution every 2 months.

Soaking of Seed: Use 1% Masinag solution (mix 1 liter Masinag Organic for every 100 li of water) and soak the seeds to be planted by 4 hours. Withdraw and inoculate for at least 5 hours using a clean dry cloth. Sow the seed.
